FRANCESCO
Pescara

What did you do before we met?

I graduated in Economics in 2014 and I joined the employment agencies' world because I like the commercial challenge and I love being able to find the right person for the right company.

I already worked in an employment agency. I come from a multinational company, where I took care of commercial activities and research & selection activities.

I have graduated in Economics. I worked as an insurance agent in an important insurance group and as a junior account in a company in the purchasing consortiums.

Why did you choose Ali?

Ali is a smart, young company where everybody counts: you're not just a number! I want to contribute and I want to learn with and thanks to my colleagues.

I choose Ali because it immediately made a good impression: it felt like a family, like a very united team. There is a strong collaboration between every branch and I enjoy this aspect very much.

Ali counts on people, motivates them and supports them. I've felt an instant connection with my supervisor, he always shares his enthusiasm!

Your sensation when you first met Ali.

I'm always stimulated, there's a lot to do. The consulting approach is a new thing I want to learn and master.

Once I joined the group, I felt a sensation of attention and care, I never feel alone while doing my job.

Right from the beginning I felt the strength of the Company and I was sure of the career possibilities.

What would you advise to those who want to undertake your same path?

The employment agencies' world is chaotic, you must be passionate and energetic.

My advice to those who want to join this world is: be curious and try to learn as much as you can from those around you.

I advise them to understand if there are real motivation to undertake this path, it's a really hard job, but if you work hard you will get your satisfaction.
